**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears bellow. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as proved by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this Examiner's Amendment was given in a telephone interview with Mr. Thomas E. Lees (Registration No. 46,867) on June 6, 2006.

In the Claims:

Please amend claims 34 and 35 as follow:

Claim 34. (Currently Amended) A computer program product for providing transactional network quality of service within an endpoint data processing system, comprising:

a computer ~~[[readable]]~~ storage medium having computer readable program code embodied therein, the computer readable program code cause the following steps being executed ~~[[comprising]]~~:

~~computer readable program code which requests~~ requesting a data transmission transaction by an application of said endpoint data processing system;

~~computer readable program code which provides~~ providing transaction service level information corresponding to said application for a data transmission transaction to a communication process of said endpoint data processing system;

~~computer readable program code which receives~~ receiving said transaction service level information by said communication process;

~~computer readable program code which evaluates~~ evaluating said transaction service level information at said endpoint data processing system;

~~computer readable program code which determines~~ determining a quality of service level at said endpoint data processing system, wherein said quality of service level is associated with said data transmission transaction and is based on said transaction service level information received by said communication process; and

~~computer readable program code which performs~~ performing a data transmission by said communications process corresponding to said data transmission transaction and said quality of service level.

Claim 35. (Currently Amended) A computer program product for establishing a quality of service level within an endpoint data processing system for the transmission of data, comprising:

a computer ~~[[readable]]~~ storage medium having computer readable program code embodied therein, the computer readable program code cause the following steps being executed ~~[[comprising]]~~:

~~computer readable program code which provides~~ providing an application program interface to a communications process of an endpoint node, which both receives content data to be transmitted by the communications process and receives quality of service information associated with the data to be transmitted so as to establish the quality of service level for the transmission of the received content data without reference to the contents of the received content data, wherein:

said application program interface provides said quality of service level to said communication process based upon receiving at least one of a specific quality of service specification from a corresponding application associated with said endpoint data processing system or from application level information which is evaluated to determine said quality of service level at said endpoint data processing system.

### ***Reasons for allowance***

3. The following is an examiner's statement of reasons for allowance:

Applicant's claimed invention distinguished over the prior art for the following reasons. The claims are allowable over the prior art of record because none of the references, either alone or in combination, discloses or renders obvious the method for providing transactional quality of service within an endpoint data processing system, the method comprising the steps of requesting a data transmission transaction by an application of said endpoint data processing, providing transaction service level information corresponding to said application for a data transmission transaction to a communication process of said endpoint data processing system; receiving said

transaction service level information by said communication process; evaluating said transaction service level information at said endpoint data processing determining a quality of service level at said endpoint data processing system, wherein said quality of service level is associated with said data transmission transaction and is based on the said transaction service level information received by said communication process application; and performing a data transmission by said communications process corresponding to said data transmission transaction and said quality of service level.

### ***Conclusion***

4. Any comments considering necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee.
  
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinsong Hu whose telephone number is (571) 272-3965. The examiner can normally be reached on 8:00 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn can be reached on (571) 272-1915. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
